

Guarantee-Certificate

Genuine Quality. Durable Trust.

Commercial vehicles are used worldwide under the toughest conditions, even far away from paved roads. Therefore, the durability and reliability of each component, day for day, is of the utmost importance. In more than 140 countries worldwide the DT® Spare Parts brand stands for safety and reliability in the Independent Aftermarket.

Core processes, such as product development, product design and quality assurance, are deliberately carried out in Germany. Here, highly qualified engineers and technicians establish the basis for a premium quality, which is ensured by use of the latest CAD and CAQ systems, as well as the most precise measuring and testing technology.

The processes, from development to the finished product, are subject to quality and environmental management in accordance with the valid standards DIN EN ISO 9001:2008 and 14001:2009 as well the occupational health and safety standard OHSAS 18001:2007. In order to ensure a guaranteed premium quality, certified suppliers from the automobile industry are involved in the continuous improvement process.

In case of any complaints regarding DT products, the 24 month DT® Spare Parts guarantee comes into force, subject to professional assembly. According to the terms of guarantee* defective products shall be replaced.
